

LOWER ELEMENTARY COMPUTER classes are designed to support classroom instruction so that phonics, math, reading, language, social studies and science concepts may be reinforced. Students are also encouraged to express themselves through creative writing.

Third, fourth, fifth and six grade students have the opportunity to learn key-boarding skills. Fourth, fifth and six grade students will complete numerous hands-on projects related to word processing and desktop publishing. Students participate in high-interest skill building exercises, applications, and games all of which consistently hold their attention. Students also participate in virtual field trips and internet scavenger hunts while building and reinforcing what is being taught in the classroom.

All lower elementary students are introduced to the Internet through the use of hands-on activities and by visiting various websites. Students learn how to explore the Internet using Internet Explorer, and how to use search engines such as Google and Bing. Students complete integrated activities in math, science, global studies, language arts, and other areas.
