

Dear Parents/Guardians,

In order to help your child be successful in math next year, they need to practice this summer. Each student has a Moby Max account set up. We have practiced logging on in class and they have taken the placement test. The placement test determines their level in math and assigns practice according to their level. Each student is expected to complete **30 minutes of math each week** throughout the summer for a **total of 3 hours** by August 9, 2021.

If your child is having difficulty logging in, please contact me at kdorsey@hbcnsi.org . I look forward to teaching your student for the 2021-22 school year.

Sincerely,
Kathleen Dorsey
MS Math
